## Table of Contents

1.Problem Statement .....	3
2.Solution .....	3

Solution\_ Guru Pra h

## 1. Problem Statement

1. What are the different methods to call a function in R?
2. The lazy evaluation of a function means, the argument is evaluated only if it is evaluated only if it is used inside the body of the function. Say True or False.
3. State True or False:
  - a. Insights driven from descriptive analytics is not meaningful.
  - b. The number of values in each Elements of a list, should be equal.
  - c. The datasets are not stored in memory of the computer using R.
  - d. Data frames and matrices are two dimensional however the array is multidimensional

Solution\_ Guru Pra h

## 2. Solution

1. 3ways, call() , do.call(), recall()

2.False, a sub-function can be used to perform the additional operation

3.

a. False, Descriptive Analysis are realtime analysis, it helps in projecting a path or pattern . Thereby enabling business to apply a course correction per business goal in the future.

b. False , `Recycling` of vector concept

c. True,datasets are stored in ROM and then gets added to RAM while executing.

d. True
